

# Maximize Your Red Hat Learning Subscription Trial

Two weeks can go by quickly, so be sure to make the most of your 14-day no-cost trial of Red Hat® Learning Subscription. To help guide you, this checklist explains the features available to you within the trial experience.

---

## 1 Comprehensive curriculum

The curriculum spans the entire Red Hat product and technology portfolio, covering topics such as automation, application development, and hybrid cloud management. Learn course material using self-paced video classrooms or e-books.

- ▶ **Course catalog:** Browse the catalog to see a variety of what is offered. The courses are updated continuously, so this list is dynamic, and the curriculum is kept up to date.
- ▶ **Course chapters:** During the trial, you can see chapter 1 and 2 of each course. Explore a few different courses to get a sense of how content is delivered.

## 2 Cloud-based labs

The labs are an important benefit of the Red Hat Learning Subscription, and each course comes with its own lab environment, with a full setup of hardware and software.

- ▶ **Lab time:** You get 4 hours of lab time in 1 course of your choosing within the trial. The labs allow you to practice what you are learning in real Red Hat environments from anywhere.
- ▶ **Lab setup:** Labs are cloud-based and give you the same access to practice in authentic Red Hat software environments that you would have in the classroom.

## 3 Additional features

The subscription includes other resources to round out your learning experience.

- ▶ **Skills paths:** These paths are created to help you choose courses towards specific Red Hat certifications. Skills paths guide your training so that you build knowledge and achieve your goals in the most effective sequence.
- ▶ **Early access content:** You get exclusive access to courses and labs that are still in development before content is publicly available. You can view chapters 1 and 2 of available early access content in the trial, so do not miss taking advantage of this benefit.

## 4 User-friendly reporting

In Red Hat Learning Subscription, there is reporting and dashboard functionality which provides a variety of insightful information.

- ▶ **Progress reports:** Take a look at the reporting feature, which shows course progression, lab grading, course completion, and more. Reports are useful for tracking your achievement of learning goals.
- ▶ **Dashboard:** Red Hat Learning Subscription contains a convenient dashboard to help you keep track of lab hours used, courses taken, hours spent training, and more—all from a single visual interface.

## Getting Started

While our course catalog offers a comprehensive overview of the diverse content we provide, we understand the importance of helping you select your first course in less time. To get a head start on your Red Hat Learning Subscription journey, consider exploring the key Red Hat platforms:

### ▶ Red Hat Enterprise Linux®

Red Hat Enterprise Linux serves as the cornerstone for open source technologies. Our training programs cater to individuals of all experience levels, offering a comprehensive Linux curriculum that nurtures real-world skills. Developed with input from customer use cases and insights from Red Hat's support team and field personnel, this training ensures a robust foundation.

### ▶ Red Hat OpenShift® Platform

Prepare your organization for the evolving landscape of artificial intelligence (AI) and edge-centric infrastructure across hybrid clouds. Our extensive training not only establishes a solid foundation but also advances IT infrastructure, streamlines operations, and aligns with business objectives. Step into a transformative learning experience that equips you with the skills needed to navigate the complexities of modern IT environments.

### ▶ Red Hat Ansible® Automation Platform

Whether you are a beginner or an expert looking to explore the benefits of advanced automation, our comprehensive curriculum on Ansible Automation Platform has you covered. Tailored for individuals at all skill levels, our courses empower users to enhance their knowledge and skills, thereby boosting productivity and advancing their careers. Learn about the ins and outs of building, installing, configuring, and managing Ansible Automation Platform to scale up your organization's use of Ansible automation.

Embark on your learning journey with confidence and let these foundational courses set the stage for your success. Welcome to the world of [Red Hat Learning Subscription](#).

### About Red Hat

Red Hat helps customers standardize across environments, develop cloud-native applications, and integrate, automate, secure, and manage complex environments with [award-winning](#) support, training, and consulting services.
