IT OPERATIONS AND INFRASTRUCTURE	IT OPERATIONS AND INFRASTRUCTURE	IT OPERATIONS AND INFRASTRUCTURE	IT OPERATIONS AND INFRASTRUCTURE
OpenShift Virtualization Manage virtualized and containerized workloads together using the same orchestration and clustering infrastructure provided by Red Hat OpenShift.	RHEL System Administration Red Hat Enterprise Linux is the foundation for Open Source technologies. The RHEL curriculum starts with the Red Hat Certified System Administrator track.	OpenShift Administration Want to learn how to deploy, administer and manage container based applications on OpenShift? This assessment helps select the course most appropriate for your current skills and use case.	Managing Enterprise Automation This assessment helps you determine the next course you should take when preparing to architect, install, manage, and scale out your OpenShift Automation Platform with Ansible Automation Platform.
